Re: Progress Report No. 15
Rogers Electric Site
Period 11/8/92 - 11/14/92
REWAI Project M91130

Dear Ms. Wolper:

Pursuant to Sec. VIII, 8.6 of the Administrative Consent Order for the Rogers Electric Site, Docket No. III-91-58-DC, the following provides a progress report for activities performed on behalf of Blake Construction Co., Inc. during the period 11/8/92 through 11/14/92. Additionally, a copy of the progress report submitted by the Defense Reutilization and Marketing Service (DRMS) covering their activities for the same period is attached.

1. The following actions have been taken toward achieving compliance with the referenced Consent Order:
 - o During the last reporting period, we waited for the return of lab results from the UST removed. Preliminary verbal results indicate very minor contamination by volatile organics and no contamination by PCBs above clean-up level. It is anticipated that excavated soils can be returned to the excavation, pending receipt of hard copies of the lab results. To date, four soil samples have been found to exceed projected clean up levels (10 ppm). All four samples were surface samples, so extensive soil excavation is still not anticipated. The remaining soil analyses results will be returned by the end of the next reporting period. As analyses results become available for the UST excavation, backfilling or continued excavation will be performed.
